🔗 Website in LinkedIn ○ GitHub

I'm a MERN stack developer who mainly focuses on building websites with React.js, Next.js, Node.js, and Express.
I specialize in making the front part of websites, but I also know how to create APIs for my projects.

Experience

Tabby

Real Time Analyst	09/2024 – present
Payment Specialist	05/2024 – 08/2024
Web Developer (Freelance)	04/2024 – present

I work on Customer Experience team projects, building websites and forms with HTML, CSS, JavaScript, and Bootstrap for the front end, Google Script for the back end, and Google Sheets as the database.

Subject Matter Expert	04/2024 – 04/2024
Customer Service Specialist	11/2023 – 03/2024

Route   12/2022 – 08/2023
Full Stack Developer - Internship

During this internship, I gained skills in HTML, CSS, JavaScript, jQuery, Bootstrap, JSON, Ajax, React.js, MongoDB, Node.js, and Express.js.

I scored 100% on the front-end exam by flawlessly replicating the provided template in my project.
Projects

Openday Software 🔗
Project used by 2k+ users

The system was built using JavaScript, Google Scripts, and Google services, eliminating the need for hosting or an external database.
- **Candidate Intake:** Candidates scanned a QR code to submit their details, stored in a Google Sheet with a unique ID for tracking.
- **Assignment Tests:** Candidates completed secure, timed tests for typing, ATD, and email skills.
- **Quality Monitoring:** Quality specialists could review email tests directly, streamlining oversight

ARQAAM (Full Stack) 🔗
Making Work Easier for Customer Service

The project was built using HTML, CSS, Material UI, Formik, React, Redux Toolkit, Node.js, and Express.

Time Zone / Watches E-Commerce (Ful Stack) 🔗
The project was built using HTML, CSS, React, React-Styled-Components, and Redux-Toolkit. I mirrored a template from Colorlib.

Education

Bachelor / Law   2018 – 2022
Cairo University
